Entrepreneurship Test Score

66/100 - Very entrepreneurial

The Y-axis shows the % of respondents in each score range. The average score for this test is 67.

Charts represent average scores in your area. No personal information is collected and all data is anonymous.

What do the scores mean?

0-18 — Not entrepreneurial

19-36 — A little entrepreneurial

37-63 — Somewhat entrepreneurial

64-81 — Very entrepreneurial

82-100 — Highly entrepreneurial

Do you agree? Why or why not?

Personally I would agree because in my 2 years in college I need to learn more about business. For me, business is a bit complicated, but it's kind of fun to learn, and also business is the best thing to earn money while having fun.
